CARAT_24 | *Curtain panel technology that inspires the imagination*

Minimalist on the outside. With inner values.

If you want to shape the future, what you need is not only years of experience, but also fascinating ideas which are completely unlike anything that has come before. You can then create products that are both technically fascinating and aesthetically pleasing.

The unique features of new high-quality CARAT_24 panel curtain set a milestone in the field of panel technology, and perfectly complement MHZ's existing FV 10, FV 15 and FV 36 panel curtain technologies.

This innovation permits surprisingly easy connection and removal of the panel carriers into the rail, from below. The individual components of the entirely newly developed receptacle system are inte-

grated into the rail on the smallest space, invisible to the outside. The visual appeal of CARAT_24's classically minimalist design can be clearly appreciated from any angle.

The clip or brackets attachment elements, specially developed for CARAT_24, allow it to be attached easily, securely and almost invisibly to walls and ceilings.

A range of fabrics, designed especially for CARAT_24, round off the exceptional development of this panel technology with a modern, sophisticated look. The skilful synthesis of technology and textiles creates a unique, holistic appearance.

MHZ CARAT_24 panel curtain | *Product benefits*

- MHZ Innovation in panel technology
 - minimalist, pared down appearance: the same visual look from every angle
 - innovative attachment system by simply inserting the panel carrier into the rail (or removing it in the same way) from below, without detaching the end caps
 - made of high-quality aluminium
 - functions exceptionally well as a room partition
 - easy to install, no tools required, completely invisible from the outside
 - Sprung clamping levers (new fastening technology) enable the fabric panels to be attached, or removed, quickly and easily for installation and cleaning
 - Angled brackets, in a matching slimline design, allow for fitting to ceilings and walls

Perfectly designed:

from start to finish Flexible and easy to handle

To hang the panel carriers used for CARAT_24 panel curtains, insert them from below, exactly where you want, into the grooves in the rail. To remove them, simply lift them out again. The really clever aspect of this system is that the hanging system in the rail is completely invisible from the outside. The fabric panels seem to float freely out from the rail itself.

This illustrates the CARAT_24's unique synthesis of textiles and technology; but its aesthetic appeal is not the only benefit. The exactly designed fastening technology used in the panel carrier holds the fabric securely and ensures the panels can

be assembled and installed without any trouble. With CARAT_24, you no longer need to level up the fabric afterwards. This simple yet sophisticated fastening technology is easy to open so panels can be removed for cleaning.

And, if necessary, you can change the position of the panel carriers, no matter if they are in a different rail or in a different position in the same rails

Once again CARAT_24 proves just how flexible and uncomplicated panel technology can be.

Less is more. Pure is perfect.

The exceptional quality of the truly minimalist, pared down, CARAT_24 panel rails, which present the same appearance from every angle, is the ideal way of putting the fabric panels centre stage. The three different surface finishes, anodised matt silver, powder-coated white, and brushed stainless steel, emphasise the sleek, clean lines of the design and create a harmonious composition of textiles and technology.

Although created to be truly minimalist, MHZ panel curtains can be used in a multiplicity of creative ways, whether for floor to ceiling windows, large

scale window fronts or as room partitions. Choose the right, panel widths and hanging options to suit your own taste or to fit perfectly into your architectural environment.

The very ease with which CARAT_24 panels can be handled, and the simplicity of hanging, re-hanging and removing the individual fabric panels, frees your own creativity for innovative compositions and room design. Why not turn your living spaces into unique, sophisticated and truly individual works of art?.

Model 01-4222, CARAT_24 bracket colour 112, anodised matt silver, ideal for use with fabrics in the "SILVER STONE" RANGE.

Model 01-4223, CARAT_24 bracket colour 253, brushed stainless steel. Fabrics from the "GOLDEN GLAM" range have been especially designed to complement this colour.

CARAT_24 panel technology | *Aesthetics*

- form and design, pared down to an absolute minimum
 - three high-quality surface finishes 112 anodised matt silver, 171 powder-coated white, 253 brushed stainless steel
 - every colour designed to create a sense of harmony between textiles and technologies

THE COLLECTION | *Transparent rails create artistic objects*

Textile impressions. In harmony with technology.

New panel materials have been designed to complement the sophisticated, minimalist vocabulary of form and fabric used in CARAT_24. Fully in tune with the modern Zeitgeist, these fabrics are characterised by subtle surface finishes, and luminous transparency whilst being extremely easy to handle and care for.

Simply choose the look you want: different degrees of transparency and surface finishes, elegant, fine-threaded weaves, block striped organzas, striking printed graphic designs or classical minimalist woven meshes with an authentic grace and charm.

All these options are available in our top-quality weaves and prints, in classical interior colours such as white, cream, natural, taupe, grey, anthracite and black. Our range of plain fabrics includes vibrant and striking modern colours such as fresh shades of green, red tones and petrol blues.

Use this multiplicity of design variants and possible combinations of individual fabric panels to create unique effects. Overlap transparent layers to create harmonious, contrasting, or even surprising effects with light, which imbue your living spaces with an ever-changing truly personalised atmosphere.
